Sustainability in Agriculture, Food production and Food Technology in the Danube Region

DANUBE AGRIFOOD MASTER - DAFM

JOINT MASTER PROGRAM

Focusing on sustainable development and bioeconomy as competent response to the upcoming challenges of climate change and protection and promotion of livelihoods. It uses the Danube region as a model region for all riparian regions worldwide.

CURRICULUM STRUCTURE

OVERVIEW

DAFM Programme focuses on sustainable development as competent response to the upcoming challenges of climate change and protection and promotion of livelihoods. It combines the **unique expertise of the HEI-consortium** to provide top-quality research based education in sustainable agriculture, food security, food production and technology as core contents. It provides **knowledge in all relevant disciplines** from natural sciences, engineering, economics to social sciences, offering extensive opportunities for interdisciplinary approaches and intercultural communication.

LEARNING OUTCOMES

- ✓ Excellent knowledge of agriculture and food production
- ✓ Network and exchange of the most actual knowledge
- ✓ An understanding of the principles of sustainability
- ✓ River basin seen from ecology, rural development and cultural history side
- ✓ Critical selection and application of adequate methods for sustainability
- ✓ The ability to analyze social interactions in an intercultural context
